Mobile No.   (309) 363-2018

/ EDUCATION HISTORY

>> Turing School of Software & Design
Front End Engineer | 2020-2021
> Fundamental Web Technologies with JavaScript
> Professional Client-Side Development
> Cross Team Processes & Applications

>> Cornell College
Biology MS | Class of 2014
> Collaborative Lab & Field Research
> Organize Diversity-Oriented In-School Events

/ PROJECT WORK EXPERIENCE

>> What's Cookin'
https://demaceo.github.io/whats-cookin/
Created physical and prototype designs and functions for a simple and elegant site to search, share, and store a user's recipes.

>> Moody Tunes
https://brabbuss.github.io/moodytunes/
Created a music recommendation engine that provides songs based on a user's mood. The project emphasizes React fundamentals, such as state management/synching across components, and the flow and management of asynchronous operations.
